

OS LAB

23. Develop a C program for implementing random access file for processing the employee details.

```
#include <stdio.h>
```

```
struct employee
```

```
{
```

```
    int id;
```

```
    char name[20];
```

```
    float salary;
```

```
};
```

```
int main()
```

```
{
```

```
    struct employee e[10];
```

```
    int n, i, r;
```

```
    printf("Enter number of employees: ");
```

```
    scanf("%d", &n);
```

```
    for(i=0; i<n; i++)
```

```
    {
```

```
        printf("\nEnter ID: ");
```

```
        scanf("%d", &e[i].id);
```

```
        printf("Enter Name: ");
```

```
        scanf("%s", e[i].name);
```

```
        printf("Enter Salary: ");
```

```
        scanf("%f", &e[i].salary);
```

```
    }
```

```
printf("\nEnter record number to access: ");  
scanf("%d", &r);  
if(r >= 1 && r <= n)  
{  
    printf("\nEmployee Details");  
    printf("\nID: %d", e[r-1].id);  
    printf("\nName: %s", e[r-1].name);  
    printf("\nSalary: %.2f", e[r-1].salary);  
}  
else  
    printf("Record not found");  
return 0;  
}
```

```
Enter number of employees: 1  
  
Enter ID: 123  
Enter Name: KAVINILAVU  
Enter Salary: 2000000  
  
Enter record number to access: 3  
Record not found  
  
=== Code Execution Successful ===
```
